Preventive upper thread kinking device	3 needle plates – standard, straight & professional
Extra wide table + cloth guide	Semi-hard machine cover
Stitch Composer Software (<i>create your own stitches</i>)	Machine weight 13.2kg

Workspace

11" (280mm) of work area gives you the freedom to create. Quilting is a breeze using Janome's AcuFeed™ fabric feeding system with the extra wide table. This table has improved legs which are easily detached plus each individual leg can be adjusted.

Superior Needle Threader

The built-in superior needle threader has an external threading lever to simplify the threading process.

Professional Grade Foot (HP)

This foot is high shank and used in conjunction with the professional grade needle plate. Use straight stitches for the professional finish on piecing, hand-look quilting and everyday sewing.

Stitch Composer stitch creation program

Design original decorative stitches from scratch, using the Standard Stitch Composer software. It's easier than ever, and you can use your new creation just like a built-in-stitch, altering length and width and adding it to combinations.
